Grade 7 Maths Worksheet

Fractions

Questions:

1. Which fraction will be the same as 3,085?

Solution

1. $3,085 = \dfrac{3085}{1000} = \dfrac{5 \times 617}{5 \times 200} = \dfrac{617}{200} = 3\dfrac{17}{200}$

Any fraction which is a multiple of the fraction $\dfrac{617}{200}$ will be accepted as an answer to this question.

Appendix of Assignment Tools
Equivalence
Simplifying fractions by removing factors of the form $\dfrac{a}{a}$.
