

# Grade 8 Technology Worksheet

---

## Packaging

### **The function of packaging**

Packaging serves to

- contain and protect a product
- provide information on the product

NB: We say a product is contained if it would spill out if the package that contains it were removed, e.g. a liquid (milk) or small particles (salt) are contained.

**Look at the list below and in each case tick ✓ whether it contains and /or protects and gives the required information on the packaging.**

Product	Contains	Protects	Weight	BB date
Curry powder				
Milk				
Eggs				
Jam				
All Bran flakes				
Salt				
Aachar				
Yoghurt				
Chocolates				
Maize meal				

[30 marks]
